

## **To whom it may concern**

It is my pleasure to recommend Dr. Ioan Dzitac, professor of Artificial Intelligence & Distributed Systems at Aurel Vlaicu University of Arad, Romania, who is applying to the position of professor of Mathematics & Decision Support Systems at the Agora University of Oradea, Romania.

I know Professor Ioan Dzitac since 2008, when he was organizing the International Conference on Computers, Communications and Control, ICCCC 2008 in Oradea, Romania. He is co-founder and General Chair of this conference. Since that date and every two years Prof. Dzitac organizes this Conference that brings together researchers from different countries share and discusses their latest research findings in models, methods, techniques, tools and practices in computer networking and control. He was also member of the Program Committee of more than 60 international conferences.

Since 2009, he is Professor at Aurel Vlaicu University of Arad – Romania, Adjunct Professor at University of Chinese Academy of Sciences - Beijing, China (2013-2016) and Rector of Agora University of Oradea - Romania (2012-2016). I know of his extensive academic work that has been manifested in the publication of 3 books, 12 courses and materials for students, 5 conference proceedings and more than 70 scientific papers in journals and conferences proceedings.

Prof. Dzitac is co-founder and Editor-in-Chief of the International Journal of Computers Communications & Control, a WoS SCI Expanded quoted journal published since 2006. It is important to note that this journal has been nominated by Elsevier for Journal Excellence Award -Scopus Awards, Romania 2015. He has also participated as a member in the Editorial Board of 8 scientific journals.

I have had the opportunity to see him participating as keynote speaker and invited special sessions' organizer and chair in different ICCCC and ITQM conferences: Oradea, Romania in 2008, 2010, 2012, 2014; Suzhou, China in 2013; Moscow, Russia in 2014; Rio de Janeiro, Brazil in 2015; Beijing, China in 2016, and Asan, South Korea in 2016.

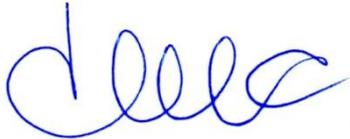

Prof. Dzitac has developed research science in the areas of artificial intelligence, applications of fuzzy logic in technology and economy, making important contributions in these areas of knowledge.

He is founder and an Associate Editor in Chief of the International Journal of Computers, Communications and Control Journal indexed by ISI Web of Science and Scopus. Also he is co-founder and General Chair of International Conference on Computers Communications and Control and he was member of the Program Committee of more than 60 international conferences.

Since 2011 Prof. Dzitac is Senior Member of IEEE – Computation Intelligence Society. Also, he is member of International Academy of Information Technology and Quantitative Management (IAITQM).

With regard to their skills, competencies and abilities I would like to highlight his kindness, respect towards people and excellent disposition to collaborate with their peers and researchers of different nationalities. This condition makes him a professor of excellence and a big researcher.

In this context, I recommend the promotion to professor at Agora University of Oradea to the professor Dzitac.
