

KA2 - Cooperation for innovation and the exchange of good practices

Before you begin completing this eForm:

- Test your connection to the Agency's online submission service. Click on the 'Test your connection' button in the footer of the eForm. This is not to submit your form but merely to test that your software settings and internet connection allow an application to be submitted. If having clicked on this button, you do not receive a confirmation that your connection was successful, please consult the 'Known Issues' section of the eForm homepage. Here you can find, amongst other things, advice on internet settings and Adobe (Reader or Acrobat) security settings, either of which can prevent a successful connection to the Agency's online submission service. Please note that, if after performing a successful test, you move your eForm to a different computer or upgrade your version of Adobe Reader, you will need to perform the test again. This is because the original test result will no longer be valid. For a fuller description of how the 'Test your connection' function works please consult the eForm User Guide.

- Check that you have the latest available version of the eForm. In the event of a significant eForm problem arising, the Agency may decide to make available an updated i.e. corrected version of the eForm. The latest version number of each eForm is displayed on the eForm homepage whilst specific details of any problem and its impact would be published on the funding opportunity webpage of the programme concerned.

These resources and other useful links can be found in a table located at the end of this eForm.

Part B. Description of the project

B.1 Summary of the project (max 2000 characters). Please note that this information may be used for dissemination purposes

For successful applications, this section will be published, as presented below, in compendia etc. You should therefore ensure that it gives a concrete overview of the work your consortium plans to undertake including:

- The reason of your project
- Concise description of the outputs, results and / or products (including where relevant key pedagogical strategies, media used, language versions, etc.)
- The impact envisaged

Please indicate the language of the summary * :

English

Please provide your summary * :

KNACK will promote cooperation and innovation among European higher education institutions, associations and businesspeople and more broadly in society to foster development of Sustainable Smart Cities (SPACE). KNACK proposes a collaborative approach on current urban needs to overcome existing inadequacies of university courses, curricula and syllabuses.

Thus KNACK MOOC modules are targeted to upgrade the built environment programme curricula. The intent is to include teamwork with non-academic partners by learning from cities with demonstrated SPACE strong points that have disseminated such awareness to other countries. It will also contribute to innovative, multidisciplinary, learner-centred and real problem-based teaching and learning approaches. Innovative teaching methods with cooperating business partners, associations and public institutions will enhance the entrepreneurial skills and attitudes of teachers and students and facilitate knowledge exchanges between academia, business and society.

The main output results are as follows:

- 1) Twelve new MOOC modules aimed at unlimited participation will be developed and integrated with existing BSc, MSc and PhD programmes.
- 2) Innovative, multidisciplinary and personalized approaches and an Intelligent Cross-Institutional Affective Educational Centre (Data and Text Mining System, Recommender System, Simulators, Facial affect detection subsystem, Affective Tutoring System and Open Educational Resources) will be developed.
- 3) The new modules will be available for one-academic year studies for 380 students in class and 210 students virtually. There will be 38 PhD students participating in the pilot project. This project also provides, over its course, virtual training for 28 teachers and 42 practitioners.

KNACK System selects educational materials of utmost benefit by considering learning materials, a student's history of learning and his/her valence, arousal and emotional state, the Yerkes-Dodson Law, etc.
